PROFILE

MSc Data Science student with a BSc in Public Health and hands-on experience designing and analysing quantitative surveys in a healthcare research setting. Builds interactive Tableau and Excel dashboards and applies statistical testing, including frequentist and Bayesian methods, to turn raw data into clear, stakeholder-ready insights for pharmaceutical market research, with an interest in extending into conjoint, MaxDiff and segmentation analysis.

KEY SKILLS

Data Visualisation & BI: Tableau, Power BI, Excel (PivotTables, dashboards, slicers, native charting)

Statistical Analysis: A/B testing, significance testing, data weighting, frequentist and Bayesian methods, SPSS

Programming: Python, R

Libraries: NumPy, pandas, scikit-learn, statsmodels (Python); tidyverse, tidymodels (R)

Market Research Methods: questionnaire development, table specifications, data quality checks, stakeholder liaison

WORK EXPERIENCE

Research Associate

Sep 2024 – Sep 2025

Health Services Academy (HSA), Islamabad

- Designed and administered wellness assessment surveys (DASS-21, CBI, BEIS-10, CD-RISC-10) for two training cohorts
- Ran longitudinal SPSS analysis of baseline vs. 6-month follow-up data, including attrition analysis, and liaised with stakeholders to report findings
- Produced Decision-Making Style Inventory scored tables and written interpretations for large batches of officers
- Developed CBP Wellness Assessment survey instruments and data-visualisation summary reports for stakeholder review

SELECTED PROJECTS

Sales & Customer Dashboard (Tableau)

Built two linked, navigable Tableau dashboards covering KPI performance against the prior year, sales trends, subcategory profit, and top-customer analysis, with filters for category, region and year.

[View on Tableau Public](#)

HR Dashboard (Tableau)

Built a Tableau HR analytics dashboard covering hiring and termination trends, departmental breakdowns, a location map, and demographic analysis by gender, age and education, on a dataset of roughly 8,950 records.

[View on Tableau Public](#)

Interactive Sales Dashboard (Excel)

Designed a fully interactive Excel dashboard using PivotTables and native charting only, with slicers driving KPI cards, trend charts and category breakdowns across \$645,223 in revenue.

[View Live Dashboard](#)

Cookie Cats A/B Test Case Study (R, Statistics)

Ran a frequentist and Bayesian analysis of a real mobile-game A/B test on player retention, including the statistical cost of peeking at results early.

EDUCATION

MSc Data Science

Sep 2025 – Sep 2026 (expected)

University of Leicester

Dissertation (MA7443): consultancy-commissioned clustering and classification of cardiac arrhythmias from 12-lead ECG data, using LightGBM, HDBSCAN, UMAP and SHAP.

BSc Public Health

Sep 2021 – Jul 2025

Health Services Academy (HSA), Islamabad

Publication: Ensemble Deep Learning for Multi-Class Chest X-Ray Classification: Robust Detection of Pneumonia and Tuberculosis, *Medical Research Archives*, 13(11), 2025. [Read publication](#)
